Grounded theory is a systematic methodology that has been largely, but not exclusively, applied to qualitative research conducted by social scientists. The methodology involves the construction of hypotheses and theories through the collecting and analysis of data. Grounded theory involves the application of inductive reasoning. The methodology contrasts with the hypothetico-deductive model used ...

Second, qualitative analysis, as all of qualitative research, is in some ways craftsmanship (Kvale, 1995). There is such a thing as poorly crafted or bad qualitative analysis, and despite their reluctance to issue universal criteria, seasoned qualitative researchers of different bents can still usually agree when they see an example of it.
